

Incident Notification

Incident Date: June 12, 2023

Title: Contaminated Slurry Tote

Description: One empty contaminated slurry tote from McClean Lake was received at Cigar Lake. A visual inspection was performed and material was noticed on the side of a tote by Cigar Lake staff, who then confirmed the presence of removable contamination exceeding the allowable non-fixed contamination limit for transport.

Resolution: No effects on health, safety or the environment. McClean Lake was informed and the ore slurry tote was cleaned at Cigar Lake. The CNSC was notified and an investigation is ongoing.
