

Incident Notification

Incident Date: May 7, 2025

Title: **McClellan Lake Operation – Dangerous Occurrence,
Damage to 600V Wire**

Description: While an employee was cutting a fiberglass grating to remove a spool of wire, a 600V electrical cable appeared to be damaged. An electrician was called to do a visual inspection and determined that the cable was intact and safe. When the spool section was removed through the grating, there was a spark from the cable.

Resolution: A more detailed inspection showed that the cable was damaged. Work was halted and the area locked out to allow for repair of the damaged cable. No effects on the environment, health or safety. Regulatory authorities have been notified.
