

## Incident Notification

**Incident Date:** March 26, 2026

**Title:** **Dump Truck Entered the Ditch**

**Description:** A loaded Komatsu 400 dump truck was travelling toward the Sue site when it lost traction, rotated approximately 180 degrees, and came to rest in the ditch on the same side of the road. Approximately 20 kg of material below regulatory reporting thresholds was released onto the snow berm adjacent to the roadway.

The driver and one passenger were in the vehicle at the time of the incident and were both wearing seatbelts. Speed was not a factor. No injuries were reported.

**Resolution:** The dump truck was recovered using a loader. The released material, along with the affected snow, was collected using a loader and haul truck and disposed of at the Sue C landfill. An investigation is ongoing. Provincial and federal regulators have been notified.
