

COMMITMENT: COMMUNITY WELLBEING

Mongolia: buying local to contribute to economic development

Badrakh Energy LLC sources meat from local farmers

Aden Services, Badrakh Energy's food service provider, entered into a contract on December 2021 to source meat from local farmers.

This meat will be used to supply the kitchens of the living compound, which accommodates up to 80 people on average.

Five herder families from Argalant bagh in the soum of Ulaanbadrakh have participated in this operation and will provide 25 cattle and 250 sheep.

This type of action is an integral part of Orano Mining's purchasing policy and contributes to local economic development.

Badrakh Energy encourages local food procurement from neighboring communities and hopes to expand this initiative in the future.
