

Mining contracts, licenses and amendments list of Orano Mining’ subsidiaries carrying out exploration, development and extractive production activities signed with local governments, not subject to legal, regulatory or contractual confidentiality obligations.

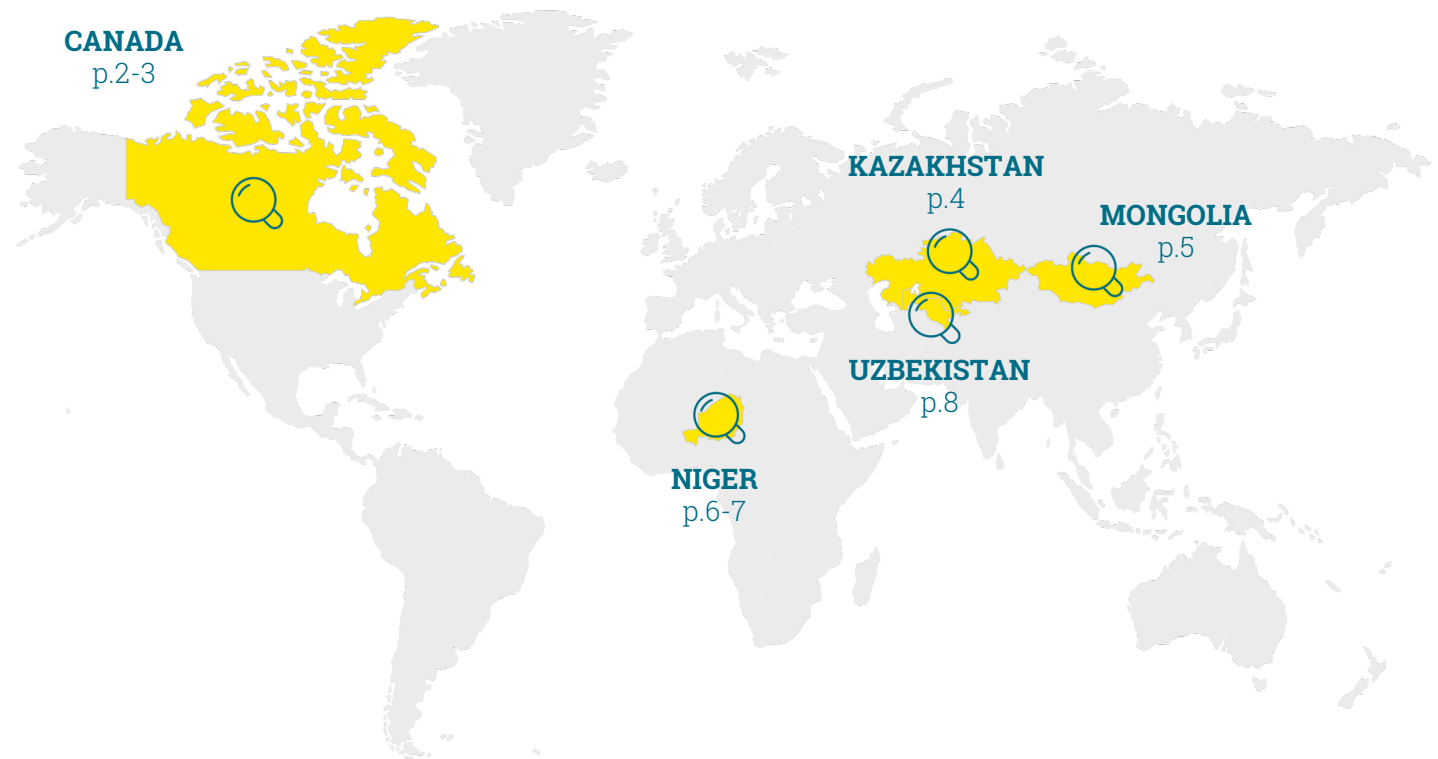

Committed to transparency, Orano Mining has been publishing its payments to States in accordance with the obligations of the French law and the EITI (Extractive Industries Transparency Initiative) framework since its creation in 2003.

As of June 2019, on the occasion of the EITI Global Conference held in Paris, Nicolas Maes, CEO of Orano Mining, made a commitment to work with our public and private co-shareholders or counterparties and the States of the countries in which we operate and for the projects where we intervene as operators, to aim for publication, by 2021, of the mining contracts and agreements entered into with States.

As part of this exercise, you will find here references or links indicating where to find the publication of mining contracts, licenses and amendments of our subsidiaries engaged in exploration, development and production activities concluded with local governments, insofar as these are not subject to legal, regulatory or contractual confidentiality obligations.

True to our values of continuous progress and integrity, we are committed to pursuing work with our partners and the governments of the countries in which we operate to encourage them in the disclosure of contracts, in accordance with the EITI principles.

(1) Orano hereby specifies that, although it remains the legal holder of the Arlit concession, the Group has confirmed, since December 4th 2024, the loss of operational control over its subsidiaries in Niger.

(2) Orano has opened international arbitration proceedings against the State of Niger following the withdrawal of its mining license for IMOURAREN, dated 19 June 2024.

This move comes after several months of unsuccessful attempts at mediation and conciliation.
